TABLE OF CONTENTS

<u>Table No.</u>	<u>Page No.</u>
Highlights. . . . .	3
1. Federal order minimum Class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, February. . . . .	4
2. Federal order minimum Class I and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, January-February averages. . . . .	6
3. Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, February . . . . .	8
4. Producer milk deliveries used in Class I and gross Class I sales by handlers regulated under Federal orders, February. . . . .	10
5. Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I January-February. . . . .	12
6. Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, January, with comparisons . . . . .	14
7. Federal milk order Class I formula price information, February. . . . .	18
8. Prices and economic indexes used in Federal milk order formulas to determine February prices, with comparisons . . . . .	20
9. Federal order base and excess prices for milk of 3.5 percent butterfat content, February . . . . .	21
9a. Seasonal incentive fund included under various Federal milk orders, February . . . . .	21
10. Measures of growth in Federal milk order markets, 1947-66 . . . . .	22
Major order actions, February . . . . .	23

## FEDERAL MILK ORDER MARKET STATISTICS

HighlightsFEBRUARY 1967

Producer Deliveries. A total of 128,103 producers delivered 3.8 billion pounds of milk to regulated handlers in 68 comparable markets during February 1967. This represents an increase of 1.6 percent above producer deliveries in February 1966. Average daily delivery per producer increased from 979 pounds in February 1966 to 1,047 pounds in February of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown on table 3.

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in 68 markets decreased 2.0 percent from last year, to a total of 2.5 billion pounds for the month of February 1967. The average utilization percentage for February was 66 percent, down from 69 percent last year. Eight markets showed an increase in the utilization percentage, 3 showed no change, and the remaining 58 markets showed a decrease (See table 4).

Gross Class I sales, which comprise total Class I sales by regulated handlers, in-and-out of defined marketing areas, decreased 1.7 percent in the 68 markets for the month of February.

Minimum Prices. The weighted average Class I price paid by handlers in the 68 markets for 3.5 percent milk was \$5.98 per hundredweight, 64 cents higher than the \$5.34 per hundredweight price in February 1966. Minimum Class I prices for February were higher in all 68 markets.

Producers in the 68 markets received a weighted average blend price of \$5.32 per hundredweight for 3.5 percent milk. This is 55 cents higher than the February 1966 blend price of \$4.77. Producers received higher blend prices in all 68 markets. Class prices, blend prices, and associated butterfat differentials, by markets are reported on table 1.

Fluid Milk Sales. Total in-area fluid milk sales for February 1967 in 66 marketing areas are estimated to be about 2.0 billion pounds, 0.3 percent below such sales in February of last year. Complete January in-area sales for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported on table 6.

YEAR TO DATE

Minimum Prices. The weighted average Class I price for the January-February period for the 68 markets was \$5.98, 63 cents higher than the \$5.35 price in 1966. The 1967 weighted average blend price was \$5.33, 58 cents higher than the blend price of \$4.75 reported for this period in 1966 (see table 2).

Producer Deliveries and Deliveries Used in Class I. Milk deliveries and deliveries used in Class I are reported for individual markets on table 5. In the first two months of this year, compared to the same period in 1966, producer deliveries for the 68 markets were up 2.0 percent, and deliveries used in Class I were down 1.9 percent. Data for the 68 markets and for all markets are summarized below:

## Producer Milk Deliveries and Deliveries Used in Class I, January-February

Markets	Producer Deliveries			Deliveries used in Class I		
	1967		Change from 1966	1967		Change from 1966
	1,000 lb.	1,000 lb.	Percent	1,000 lb.	1,000 lb.	Percent
68 Comparable markets 1/	7,838,289	+151,124	+ 2.0	5,222,923	-100,380	- 1.9
5 Non-comparable markets 2/	878,752	+657,800	++3/ 553,049	+373,732		
73 All markets 3/	8,708,087	+812,242	+10.3	5,775,972	+281,756	+ 5.1

1/ Markets under continuous regulation since January 1, 1966, and which have had no significant marketing area expansions.

2/ Upper Florida, Milwaukee, Southern Illinois, Central Illinois, and Sioux City.

3/ Excludes Sioux City.

24/ Preliminary.

MAJOR ORDER ACTIONS, FEBRUARY 1967

Amendments:

Connecticut and Massachusetts-Rhode Island - February 1 (32 FR 2362 and 2361, 2/3/67).

Action modifies the zone differential provisions in both orders to provide the continued use of mileages previously determined through Mileage Guide No. 7 and used by the market administrator in zoning plants, when such mileages are less than those determined by use of the current mileage guide (presently Mileage Guide No. 8).

Dayton-Springfield - February 28 (32 FR 3337, 2/28/67). Amendment provides for an "equivalent price" provision to be included in the order.

Kansas City - February 1 (32 FR 2363, 2/3/67). To qualify for pooling, a supply plant must ship to pool distributing plants at least 30 percent of its Grade A receipts during the months of November through January and 50 percent during the months of February through October. A supply plant operated by a cooperative association would be required to ship 65 percent of its producer-member milk to distributing plants during the months of September through January and 50 percent during the months of February through August. Two or more cooperative associations may qualify a supply plant operated by one of such cooperatives on the basis of their combined deliveries to pool distributing plants.

A handler or cooperative association may divert the milk of any member producer whose milk is received at a pool distributing plant for at least 6 days' production during the month. Diversions may not exceed 35 percent during each of the months of September through January and 100 percent during February through August of the larger of (1) the total member-producer milk received at all pool distributing plants during the current month, or (2) the average daily quantity of member-producer milk received at pool distributing plants during the previous month multiplied by the number of days in the current month.

Northern Louisiana - February 1 (32 FR 1125, 2/1/67). Amendment revokes the base-excess provisions of the order.

Suspensions:

Indianapolis - February 16 (32 FR 2939, 2/16/67). Suspension order permits a Class II classification on milk diverted, during the period January 26-31, 1967, to nonpool plants in Wisconsin for manufacturing. The order normally would require a Class I classification on milk moved more than 300 miles from Indianapolis regardless of use.

New York-New Jersey - February 1 (32 FR 2362, 2/3/67). Action changes the seasonal adjustment factor for the month of February to offset a Class I price decrease which would otherwise result because of inappropriate changes in the utilization adjustment percentages due to the practice of standardization now prevalent in the market.

Southern Illinois - February 8 (32 FR 2611, 2/8/67). The suspension order deletes for the month of January 1967, the 50 percent route disposition requirement applicable to pool distributing plants. The effective requirement would then be 40 percent as contained in the remaining provisions.

Termination:

New York-New Jersey - February 11 (32 FR 2807, 2/11/67). Action terminates the nearby differential provisions of the order.
